

BLACK FINISH HARDWARE PRODUCTS

A unique and different finish to complement blacked out boat designs

Helping deliver the boating experience your brand deserves.

foreStar

Starting with all of our most popular hardware items, foreStar now provides a different look from the traditional clear anodized finish:

- Bases are e-coated and then powder coated for a durable finish that hides scuffing and usage marks to keep hardware looking like new in any environment
- Posts are hard coat anodized for that deep black look that is impervious to UV rays
- Corresponding components-including swivels and handles receive the blacked out treatment to complete the overall look
- Various heights, adjustability and slide/swivel options available
