

POSI-PIN

REMOVABLE PEDESTAL SYSTEM

Providing maximum flexibility and stability.

Helping deliver the boating experience your brand deserves.

www.forestarindustries.com

Posi-Pin is a 3/4" pin, removable pedestal system that utilizes an exclusive thread design to maximize performance and stability.

- 3/4" pin threads through base to provide secure attachment while allowing post to swivel freely without unscrewing
- Thread design eliminates any weight transfer to attachment threads, eliminating damage, binding or possibility of corrosion resulting in an irremovable post.
- Post is easily removed by engaging threads and turning counter clockwise 2-3 rotations- post cannot be overtightened
- Bases available in standard 7"x7", 4"x8" & 6"x8" in E-coated and stainless material
- Bushings available in black nylon and true machined brass (not powdered brass)
- Posts available in multiple fixed heights and adjustable varieties using anodized aluminum, bright dipped anodized aluminum or stainless steel tubing
- Custom bases and posts available upon request
